

## Site Services

In addition to our core hire services, we also provide a selection of site services, which have been developed as a result of increasing demand from our customers. This development reflects our ability to listen and understand our customers' requirements, to find and put in place appropriate solutions to meet your needs. Delivering quality site services for our customers is one of our main drivers and we have established an excellent network of supply partners to help us achieve this.

In the delivery of site services, health and safety is our top priority and we are an accredited safe contractor. We will arrange site surveys to confirm work specifications on all work before confirming a fixed price and provide risk assessments and method statements in advance of work commencing on site.
